

ARCHITECTURAL WOODWORK STANDARDS

Presented by Woodwork Institute

On October 1, 2009, *Architectural Woodwork Standards* officially replaced Woodwork Institute's *Manual of Millwork*.

Due to its joint publication, there are changes that you should be aware of, and are included within this seminar.

The seminar will include:

- **A brief history of architectural woodwork quality standards**
 - The *Manual of Millwork*
 - *Quality Standards Illustrated*
 - WI, AWI, and AWMAC
 - ***Architectural Woodwork Standards (AWS)***
 - The new quality standard for all of North America
 - A collaboration of AWI, AWMAC, and WI
 - **What's in the *AWS*?**
 - Objective, measurable standards for all types of architectural millwork
 - How the *AWS* is organized
 - Sections
 - Organizations within sections
 - **Comparison of *AWS* and *Manual of Millwork***
 - Because of the Associations collaboration, the new *AWS* has some distinct enhancements not necessarily fully addressed in the *Manual of Millwork*.
 - **How to use the *AWS* in your specifications**
 - **Quality Assurance programs based on the *AWS***
 - **Woodwork Institute:**
 - **Certified Compliance**
 - **Monitored Compliance**
 - AWI: Quality Assurance Program
 - **Other services provided by Woodwork Institute**
 - Design Consultation
 - Guide specifications and consultation
 - **Wood: A Renewable Material**
 - Selecting and specifying wood and veneer
 - **An overview of standards for doors, panel products, case work, and countertops**
- This program is registered with the AIA Continuing Education System

**WOODWORK
INSTITUTE**
