

Woodwork Institute presents

Specifying Architectural Woodwork-

**At the end of this seminar
attendees will be able to:**

1. Identify CSI specification sections that can be specified using Architectural Woodwork Standards
2. Use the AWS Grades in architectural woodwork specifications.
3. Identify plain sliced, quarter sawn, and rotary cut veneers.
4. Identify book matched and slip matched panels.
5. Specify the Woodwork Institute quality assurance programs.
